

SARAH JEAN ESGUERRA MORADA

BS Mathematics Graduate

09369442491 | sarahjeanesguerramorada@gmail.com | San Narciso, Quezon

PROFILE

Analytical and detail-oriented BS Mathematics graduate with a strong theoretical foundation in statistical analysis and data modeling, paired with practical, foundational knowledge in data pipelines. Proven experience utilizing Excel for rigorous data cleaning, transforming raw datasets, and validating information for corporate reporting. Possesses a solid academic foundation in R, SQL, and Python, with a strong ability to build clean data dashboards and identify patterns or anomalies within structured datasets. Adaptable and detail-oriented, with a strong interest in applying data-driven insights in analytical and business-related roles.

INTERNSHIP EXPERIENCE

INTERN AT ACCOUNTING DEPARTMENT
Extramind F & A Outsourcing, Inc.

March - May 2026
Esteban St. Legaspi Village, Makati City, Philippines

- Data Management & Accuracy:** Cleaned, validated, and managed complex corporate datasets using advanced Excel tools (Pivot Tables, XLOOKUP, and VLOOKUP) to improve data accuracy and reporting reliability.
- Discrepancy Resolution & Compliance:** Actively identified and resolved data discrepancies through meticulous reconciliation and quality checks, ensuring all project deliverables met strict organizational standards.
- Project Coordination:** Managed daily data workflows and extraction tasks efficiently under tight deadlines while collaborating effectively with team members to ensure seamless project delivery.

EDUCATIONAL RESEARCH

Volatility Dynamics and Time-Varying Interdependence in the Philippine Stock Market: A Univariate and Multivariate Time Series Analysis | *Co-Author, April 2026*

- Statistical Modeling & Insights:** Developed time-series models in R using 10 years of daily market data to isolate risk behaviors, track patterns, and generate forecasts for strategic decision-making.
- Complex Data Presentation:** Analyzed and structured multivariate interdependencies, presenting data-backed visual trends that translated technical statistics into clear business intelligence.

Copula- Based Joint Modeling of Wind Speed and Direction | *Co-Author, December 2026*

- Large-Scale Data Handling:** Managed, cleaned, and processed a massive environmental dataset spanning 44 years to evaluate long-term patterns and regional variances.
- Anomalies & Modeling:** Built joint models to capture variables and uncover underlying distribution shapes, generating actionable insights for regional developmental potential.

SKILLS

- Data Analytics:** Data Cleaning, Data Validation, Statistical Analysis, Statistical Modeling, Data Visualization, Dashboard Development
- Programming & Database:** R / RStudio, SQL, Python (Basic)
- Tools & Software:** Power BI, Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, Conditional Formatting)

EDUCATION

SOUTHERN LUZON STATE UNIVERSITY
Bachelor of Science in Mathematics

September 2022 - June 2026
Lucban, Quezon

Relevant Coursework: Actuarial Mathematics & Theory of Interest, Statistical Modeling & Multivariate Analysis, Mathematical Modeling, Operations Research and Numerical Analysis,

CERTIFICATIONS

- Civil Service Professional Eligibility (Professional Level), *August 2025*
- Data Analytics Essentials – Cisco Networking Academy (via DICT-ITU DTC Initiative), *June 2026*
